THE PRIME ADVANTAGE

Technology

Crafted with the best raw materials and run on SACMI Italy turnkey state of art plant, Prime Tiles are class apart. The engineering used in the manufacturing process encompasses the most developments and sophistication in ceramic tile manufacturing technology. The wet grinding body preparation, pressing process, automatic lines, glaze line, digital printing, superior kiln, packaging and sorting are all from the best in the industry. Noteworthy is the sophisticated robotic sorting line at Prime Tiles Manufacturing facility, which ensure the planarity, thickness, sizes, shades and other such critical parameters are checked using infrared technology and every tile comes out as perfect piece to be laid.

Designs

The tiles have been careful selected based on taste of consumers and cover the most contemporary stylish patterns. The ultra modern digital printing technology and usage of Spanish Inks ensures flawless design patterns and glow. Everyone has a choice to make and all choices are available.

Pricing

The price of Prime Tiles is one of the most competitive in the industry. Armed with superior sourcing of raw material, use of domestic resources, lesser transport cost and lead time, efficient manufacturing process and transcending trade barriers and costs, Prime Tiles costs less than any other superior tiles in the market. We bring a treat for the Nepalese consumer on the table.

Sustainability

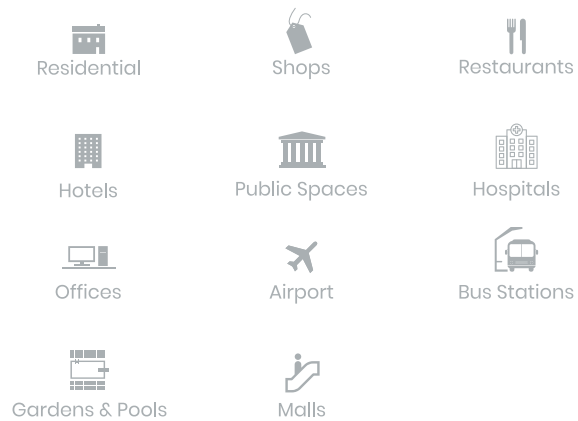

Price of Prime Tiles is one of the most competitive in the industry. We are fair, transparent and believe in ethical business practices. Sustain ability is in our core value system and usage of efficient energy system, environmental practices, occupational health and safety and social inclusion is ensured. Prime is a long term player and does not take any short cuts.

CERMAIC WALL TILES

Ceramic Wall tiles are used for both residential as well as commercial purpose. These tiles are easy to clean, budget-friendly, high glossiness and requires easy maintenance. Due to required water absorption of 10-15% the wall tiles are able to fix properly on wall surface with more durability and less cost of fixing. The patterns and colors available allows the creation of an appealing environment in resident and commercial spaces.
